LETTER OF RECOMMENDATION

Southwest General Contractors completed a window replacement project at Tascosa High School in November 2008 for Amarillo Independent School District. I served as Owner Representative/Construction Manager for this 1.7 million dollar project and want to compliment Southwest General Contractors for a job well done.

Southwest placed an experienced Job Superintendent on the project that worked well with school staff and understood the need to keep campus functioning at 100% during construction. It is not an easy task to work at a large High School campus while classes are in session.

I estimated that this would be an eleven month project and Southwest completed ahead of schedule. I attribute early completion and basically problem free project to Southwest General project management approach, quality job supervision and demanding sub contractors to perform at or above industry standards.

If you are considering Southwest General Contractors for a project please feel free to call me for reference information.
