

### **Plainview High School: Additions and Renovations**

Location: Plainview, TX

#### **Construction Type:**

Educational Facilities

#### **Construction Methods:**

Structural members include reinforced concrete foundations, fabricated structural steel framing, metal joists and structural decking. Exterior is brick veneer and stone, engineered aluminum curtain wall window systems, and modified built-up roofing.

#### **Square Footage:**

Phase I: 13,894 s.f. New Construction  
Phase II: 17,267 s.f. New Construction  
Phase III: 11,269 s.f. Renovations

#### **Contract Amount:**

\$10,910,819  
(Construction Manager at Risk.)

#### **Schedule/**

#### **Duration:**

2 Years

#### **Additional Notes:**

Phasing of the project was used to allow construction to continue while classes were underway. SWGC self-performed several scopes, including demolition of existing classrooms to allow for new construction. References for this project are available upon request.
