

Canyon Independent School District

Darryl Flusche
Superintendent

February 10, 2017

To Whom It May Concern:

Southwest General Contractors has worked with Canyon ISD on projects from 2015-present. Their company most recently completed work on constructing a tennis facility, a classroom addition, and we broke ground in December on a new 5th-6th Intermediate School.

As a growing school district, there is an ongoing need for renovations and new classroom space. Our work with Southwest General Contractors continues to deliver quality outcomes. The Boyce Tennis Facility had challenges during construction with rain. Southwest General redoubled their efforts to help with drying and schedule adjustments to maximize their work time. The six classroom addition at City View Elementary was completed timely and under budget. Our preparations and beginning construction of the new intermediate school have also gone very smoothly.

Weekly meetings occurred with each of the projects mentioned to ensure thorough and timely communication. Site supervisors, construction office administrators, and school district staff participate in the weekly meetings. This process ensures thorough communication and understanding of the tasks and the timeline. We have been able to ask questions for further detail and suggest adjustments due to school events or other conflicts with the schedule. This effort minimized the surprises and raised our level of confidence.

Southwest General Contractors furthers the reputation of the school district through their diligent leadership. This company reaches beyond construction efforts to partner with the district in efforts to create quality instructional spaces. I strongly recommend Southwest General Contractors to any school district.

Sincerely,

A handwritten signature in cursive script that reads "Darryl Flusche".
