

Canyon Independent School District

Darryl Flusche
Superintendent

May 2, 2022

To Whom It May Concern:

Southwest General Contractors has worked with Canyon ISD on projects from 2015-present. Their company has constructed several facilities for Canyon ISD including a tennis facility, a classroom addition, Pinnacle Intermediate School, major renovations to four older schools along with updates to Randall High School. SWGC built two new schools, Heritage Hills and Spring Canyon Elementary Schools. These projects were completed on time and the work quality is at a high level.

Canyon ISD is a growing school district. The need for timely renovations and new classroom space was extraordinary. Our work with Southwest General Contractors continues to deliver quality outcomes. It is not unusual for renovations of older buildings to uncover unexpected challenges. Southwest General redoubled their efforts to address these challenges and schedule adjustments to maximize their work time.

Preparations for our projects took place very smoothly. Weekly meetings occurred with each of the projects mentioned to ensure thorough and timely communication. Site supervisors, construction office administrators, and school district staff participated in the weekly meetings. This process enabled thorough communication and understanding of the tasks and the timeline. We were able to ask questions for further detail and suggest adjustments due to school events or other conflicts with the schedule. This effort minimized the surprises and raised our level of confidence.

Southwest General Contractors furthers the reputation of the school district through their diligent leadership. This company reaches beyond construction efforts to partner with the district in efforts to create quality instructional spaces. I strongly recommend Southwest General Contractors to any school district.

Sincerely,

Darryl Flusche, Ed.D.
Superintendent, Canyon ISD
